

Carlile Transportation Standardizes on IQeye HD Megapixel Technology

IQeye images provide detail needed to save the transportation company money and achieve 100% ROI

San Juan Capistrano, CA, September 13, 2011—IQinVision (www.iqeye.com), market leader in high-performance HD megapixel IP cameras, today announced that Carlile Transportation is utilizing IQeye HD megapixel cameras at two of its trucking terminal complexes and has plans to install IQeye cameras at all 10 of its North American terminals. Anixter is the value added distribution partner for this on-going project.

Carlile Transportation Systems, founded in 1980 by brothers John and Harry McDonald, has grown from two tractors to one of Alaska's largest trucking companies. Today, Carlile's wholly-owned terminals serve Alaska from Anchorage, Fairbanks, Kenai, Kodiak, Prudhoe Bay and Seward, as well as Tacoma, WA, Houston, TX, Blaine, MN, and Edmonton, AB. An interesting side note: Carlile drivers are featured in History Channel's "Ice Road Truckers" for the second year.

Carlile had been using analog cameras to monitor some of their terminals, but as company CTO Eugene O'Neal related, "The picture quality was bad, so we really needed the clarity that megapixel offers." To date, Carlile has installed a mix of IQeye Sentinels and Alliance domes at its expansive warehouse, loading, and administrative facilities located in Anchorage and Fairbanks. Both the Tacoma and Houston locations are slated for installation of over 100 cameras in the next few months. Camera data is managed by Milestone XProtect® open platform video management software.

Eugene O'Neal and his team perform a combination of live video monitoring and incident review of all the action in and around their freight terminals at all times. "These cameras have paid for themselves in no time," said O'Neal. "In our business, there are a good number of freight claim situations and they can add up to a lot of money. With these crystal clear images, I know what really happened. I've got proof."

Carlile moves everything from gas and oil equipment modules to general freight commodities to fish. Their 75+ 3-megapixel IQeye Sentinels and Alliances at both Carlile locations enable them to see it all and at the level of clarity they demand.

"There is absolutely no comparison to any camera systems we've used in the past. We'll use IQeye cameras at all 10 of our terminal locations. It's unbelievable the quality you can get—right down to the license plate level," O'Neal concluded.

About IQinVision

Since 1998, IQinVision has been designing the quality engineered IQeye line of HD megapixel cameras. IQinVision is a world leader in IP network camera products, renowned for image quality, stability, and reliability in the most demanding network environments. IQinVision was first to market with megapixel IP cameras, HD cameras with on-camera recording, intelligent network cameras, and a long list of other industry firsts. IQeye cameras are integrated with all leading Network Video Recorders (NVR) and can also be used for fail-over recording, as stand-alone event recorders, and as distributed processing platforms for video analytics. The company's products are widely deployed in government, military, city center, property management, education, retail, casino, transportation, and multiple other vertical applications. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, California with a regional office in Amsterdam, Netherlands. For more information: www.iqeye.com

About Milestone Systems

Founded in 1998, Milestone Systems is the global industry leader in open platform IP video management software. The XProtect® platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-in-class solutions to video enable organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners. For more information, visit www.milestonesys.com
