

Below we have provided sample questions to demonstrate the format of the Milestone Online Advanced Re-certification test. The sample questions are intended to show the different subject areas which the test taker will encounter. The questions are only sample questions and are not used in the actual test.

Correct answers appear in bold blue text.

Company

How does Milestone *define* 'Openness'?

- A. Enable hardware manufacturers to integrate up-to-date drivers with Milestone XProtect® software to provide our customers to choose the best hardware
- B. Allow as many software developers as possible to integrate with the XProtect® products via the Milestone Integration Platform Software Development Kit (MIP SDK)
- C. Decoupling software from hardware to give users freedom to choose the best combination that truly meets their business needs**
- D. All the above are correct

Products

What is the Milestone Integration Platform Software Development Kit (MIP SDK)?

- A. An add-on product available from Milestone which allows integration solely with access control systems
- B. A comprehensive development framework for integrating with security and business solutions with open platform Milestone XProtect® VMS products**
- C. An add-on product available from Milestone which allows integration solely with third-party analytics providers
- D. It is a remote monitoring application with more features than the XProtect® Remote Client

Fundamentals

Which RAID (Redundant Array of Independent Disks) level has the BEST performance while still offering protection against a disk failure?

- A. RAID 10**
- B. RAID 5
- C. RAID 3
- D. RAID 0

XProtect® Clients

Which of the following is NOT a feature of the XProtect® Remote Client?

- A. Reducing the frame rate and quality of the live video stream between the recorder
- B. Simultaneously viewing recorded video time synchronized from up to 16 cameras
- C. Manually activating hardware outputs
- D. Matrix functionality**

XProtect® Enterprise

In XProtect® Enterprise, when and how is the Microsoft® SQL Server Express database installed?

- A. Manually during the installation process
- B. Manually before the installation process is started
- C. Automatically during the installation process**
- D. Microsoft® SQL Server Express is not used with XProtect® Enterprise

XProtect® Corporate

Which of the following statements about XProtect® Corporate Storage Areas is NOT correct?

- A. Even if it is not scheduled, the system will automatically archive at least once each day**
- B. When archiving, it is possible to groom video (reduce the frame rate) an unlimited number of times
- C. It is possible to run the archive process as frequently as every minute, if desired
- D. It is possible to create an unlimited number of Storage Areas, each with different retention and archiving settings
