

## April 19<sup>th</sup>, 2010 Release Notes – Milestone XProtect Central 3.7

It is with great pleasure that Milestone Systems announces the release of:

### Milestone XProtect Central 3.7

XProtect Central 3.7 is an operational status monitoring and alarm management solution for Milestone XProtect Corporate, XProtect Enterprise & Professional servers, video surveillance cameras and external devices. This solution ensures that operators maintain a complete overview of alarms and possible technical problems, allowing immediate visual verification and troubleshooting to resolve incidents fast.

### What's new in XProtect Central version 3.7

The new version 3.7 is the successor to the XProtect Central 3.6 and has been updated with a number of features and enhancements:

#### XProtect Central Server 3.7

- **Dynamic control image quality and frame rate**  
Default image quality and frame rate can be defined per alarm type, which can be altered manually by the operator when playing back an alarm or viewing a live stream.
- **Two-way audio support**  
Ability to establish two way audio sessions for devices with audio source (microphone) and speaker defined.
- **Auxiliary commands**  
Enables control of for example wipers on cameras connected via video servers (via Pelco protocol).
- **Additional OS Support**  
Support for Windows 7 and Windows Server 2008 R2.
