

Release Notes - Milestone XProtect[®] Mobile ver. 1

It is with great pleasure that Milestone Systems releases the brand new XProtect[®] add-on product:

XProtect Mobile – You're always close to what's important

With the new XProtect Mobile you can conveniently view your XProtect video system from almost anywhere on your smartphone or tablet. Developed and designed by Milestone, XProtect Mobile 1 is a free application that works seamlessly with all XProtect video management software (VMS) products and it is available as a download from the Android™ Market.* With instantaneous access to your XProtect surveillance system from almost anywhere around the globe via Wi-Fi, 3G or 4G connections, you can view and playback video from multiple servers and connect to cameras from different sites, helping you see what's important to you.

Key features of XProtect Mobile

- View live video from one or multiple cameras
- Play back video recordings
- Digital pinch to zoom
- Control pan-tilt-zoom (PTZ) cameras
- Set up multiple servers and connect to cameras from different sites
- Take a snapshot of your video and share it via email or MMS

XProtect Mobile licensing

XProtect Mobile is not licensed and is a free application that can be downloaded and installed on any numbers of servers and devices.

Supported XProtect products

- XProtect[®] Corporate 4 and higher
- XProtect[®] Enterprise 8 and higher
- XProtect[®] Professional 8 and higher
- XProtect[®] Express 1 and higher
- XProtect[®] Essential 2 and higher
- XProtect[®] Go 2 and higher

If the XProtect system you are using is not listed above and you want to use XProtect Mobile, please contact Milestone to learn more about upgrading.

Supported mobile devices

XProtect Mobile can be installed on any smartphone or tablet running the operating system Android 2.2 or higher.

XProtect is a registered trademark of Milestone Systems A/S. Microsoft and Windows are registered trademarks of Microsoft Corporation. This document is intended for general information purposes only, and due care has been taken in its preparation. Any risk arising from the use of this information rests with the recipient, and nothing herein should be construed as constituting any kind of warranty. Milestone Systems A/S reserve the right to make adjustments without prior notification. All names of people and organizations used in this document's examples are fictitious. Any resemblance to any actual organization or person, living or dead, is purely coincidental and unintended.

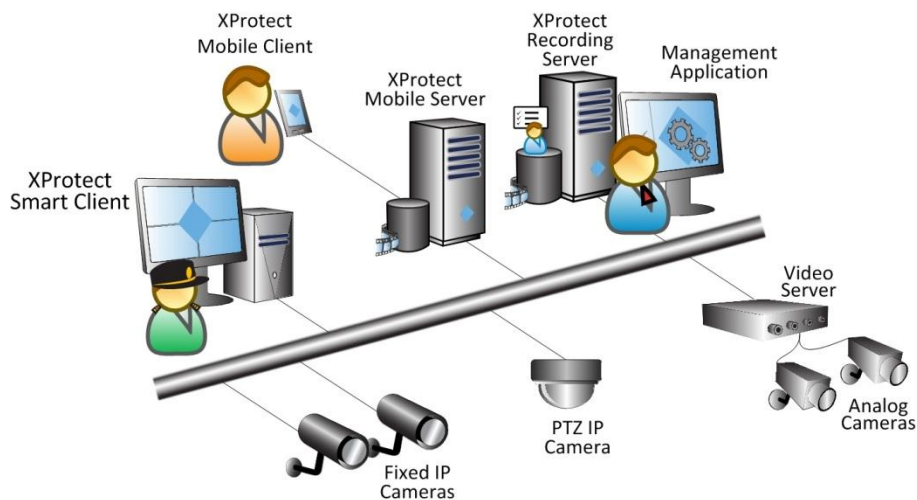

How to get started

For **existing XProtect users** who have one or more Milestone recording servers already running:

- Visit www.milestonesys.com/mobile to download and install the XProtect Mobile server on your XProtect recording server(s) or separate server(s) dedicated for remote access
- Make sure that your XProtect Mobile server is accessible from the Internet (Contact your network administrator or your Milestone integrator if you need help with this)
- Download XProtect Mobile from the Android Market on your device or from <https://market.android.com/>
- Open XProtect Mobile and add your XProtect recording server(s) in the “Servers” tab
- For more information on how to get started, please visit: www.milestonesys.com/mobile

You can always test XProtect Mobile without having a configured XProtect system. A Milestone demo server is available and has been preconfigured in XProtect Mobile. So, even if you are not currently using XProtect, you can still try XProtect Mobile and show potential customers the functions:

- Download XProtect Mobile from the Android Market on your device or from <https://market.android.com/>
- Open XProtect Mobile
- Choose the Demo Server listed within the “Servers” tab in order to test the features and functions of XProtect Mobile

Supported cameras

XProtect Mobile works with all of the cameras supported in XProtect software, more than 1,000 IP cameras and encoders from almost 100 manufacturers. A list of supported hardware is found on our website: www.milestonesys.com.

System requirements

It is recommended to use a dedicated server for installations with many cameras and/or simultaneous users. The threshold for the number of cameras and/or simultaneous users depends on the specific CPU availability of the specific installation. If in doubt, we recommend that you monitor the CPU load on the machine with the Mobile Server during typical scenarios for your setup. If you experience a continuous CPU load of more than 80%, it could impact recording services and a dedicated server is recommended to avoid overall system performance loss.

Supported languages

XProtect Mobile server

- English

XProtect Mobile
