

XProtect[®] Retail is an investigation tool for performing advanced transaction data analysis. It helps retailers optimize store operations and increase profit by identifying fraud and reducing shrinkage. Based on transaction data from POS or ATMs typically gathered in Enterprise Resource Planning Systems (ERPs), XProtect Retail links data with corresponding video from relevant cameras. Advanced search options, full video documentation and a set of pre-defined performance indicators make it easy to maintain a complete overview of store operations, cash registers/tills and employees so you can protect your entire business and customers.

XProtect Retail integrates with the following XProtect[®] products: XProtect[®] Express, XProtect[®] Professional, XProtect[®] Enterprise and XProtect[®] Corporate.
