

NEW SECURITY SOLUTIONS POWERED BY MILESTONE ARCUS

Shuttle Network Video Recorders are now bundled with Milestone Arcus™ Video Management Software

Our Network Video Recorders - NVR systems - are available in two sizes for home or business surveillance. These compact, robust NVR's are easy to use, extremely affordable and embedded with the acclaimed Milestone Arcus Video Management Software (VMS). Also included is an initial Milestone Arcus 4 Camera License and the flexibility to increase camera licenses at time of order or whenever additional cameras are needed.

The Shuttle™ NVR's can be configured for your specific coverage. Our **DS81 Slim NVR** features a 1TB Hard Drive and is easily concealable. The **SZ87 Security CUBE NVR** (a server class NVR) has a 2TB Hard Drive. Additional configurations are available to provide up to 4TB of storage space and the ability to handle up to 125* cameras.

The Shuttle NVR hardware units also include Shuttle's Acclaimed 3 year Warranty (which covers the hardware and components used to build the Shuttle NVR). Additionally, Milestone Arcus provides a separate Software Upgrade Plan that keeps you running on the latest software revision and allows an upgrade path to Milestone's Enterprise version VMS.

What is Milestone Arcus?

Milestone Arcus is a video surveillance platform now available on Shuttle Network Video Recorders to produce efficient, intuitive and ready-to-use video surveillance solutions.

ALL-IN-ONE FUNCTIONALITY – Simple To Operate Without Any Training

- Automated installation and configuration
- Camera discovery – Includes 4 Camera Licenses with ability to add more as needed
- Camera support – Many popular brands and models (over 1500+ camera drivers)
- IP Camera support and full capability with Analog video feeds
- Multiple recording modes – Continuous or motion based, including audio
- Easily configurable motion detection settings
- Live video from all cameras in one viewing interface
- Simple view and play back
- Easy export for forensic evidence and investigation
- Pan-tilt-zoom (PTZ) controls
- View your system remotely – Live view and playback through Milestone Mobile
- Automatic software upgrades with SUP (Software Upgrade Plan)

Unlimited Scalability with Central Management

Milestone® Interconnect™ allows the Arcus™ embedded Shuttle appliance to be interconnected with Milestone's premium software, XProtect® Corporate, providing a cost-efficient and flexible way to gain central surveillance operations across geographically dispersed sites and numerous Shuttle devices. (Separate licenses available direct through Milestone)
