

Spectra and Milestone Provide an End-to-End Video Surveillance Archive Solution

Milestone XProtect® VMS Platform

Milestone XProtect® Corporate is powerful IP video management software (VMS) designed for large-scale and high-security deployments. Its single management interface enables the efficient administration of the system including all cameras and security devices regardless of its size or if it is distributed across multiple sites. For systems demanding supreme situational awareness and precise response to incidents, XProtect® Corporate features interactive maps linked to alarms and included support for XProtect® Smart Wall. XProtect® Corporate provides the ultimate system reliability for high-security installations. Edge Storage support combined with failover recordings and redundant management servers ensure video recordings are never interrupted.

Highlights

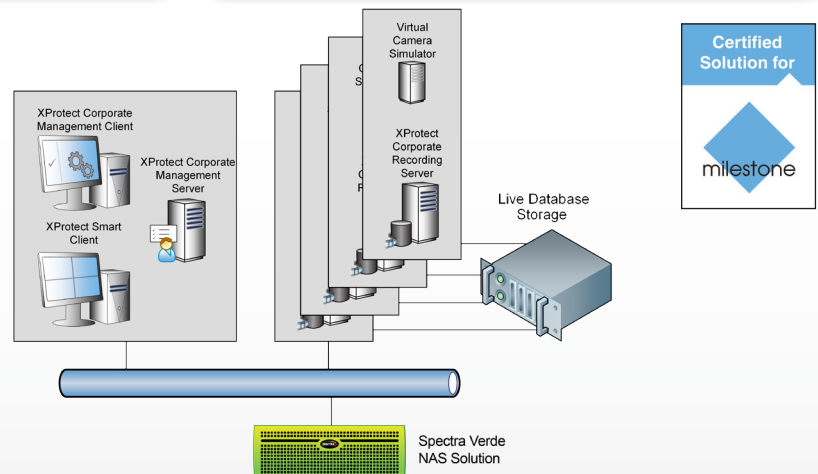

- Reliable high-performance surveillance software
- Ideal for large-scale and distributed surveillance operations
- Supreme situational awareness
- Secure and efficient video handling

Spectra® Verde® NAS Solution

Spectra Logic's Verde NAS Solution's advanced data integrity design retains and protects IP video throughout its lifecycle. As a Network Attached Storage (NAS) system, Verde stores data affordably and is easy to use, set-up and manage. By definition, NAS video surveillance storage is designed to archive IP video data during the typically lengthy period that occurs between creation, initial use and deletion. Spectra's Verde NAS solution deploys a unique technology that provides data preservation and guarantees chain of custody.

Highlights

- Reliable: redundant design
- Scalable: multi-node
- Manageable: simple installation and upkeep
- Affordable: low acquisition and operational costs

About the Solution

Spectra Logic's Verde NAS Solution (Milestone Certified) along with Milestone's XProtect® VMS Platform provides users with an end-to-end workflow for surveillance video – from IP video capture to archive. The solution easily and affordably addresses storage challenges associated with increasing numbers of cameras, pixels, and lengthening retention terms. The Spectra Verde NAS Solution seamlessly integrates with Milestone XProtect® to provide network storage of the Milestone XProtect® Archive DB. The Milestone XProtect® platform manages storage tiers by policy, allowing the Verde NAS Solution to share their storage resources across all Milestone recording servers. Spectra Verde NAS offers the highest level of data assurance for video archived from Milestone XProtect® and scalability (from 48TB to 7.1PB) to meet current and future needs.
