Demo **Installation** Configuration Troubleshooting Advanced Configuration Support Internals

Package installation on Windows

- Install the free version of SafeKit on **2 Windows nodes** with Milestone XProtect and SQL services installed on both nodes  
[Free trial of SafeKit on Windows >](#)
- Download the Windows module  
[Module milestone.safe for Windows >](#)

**Go to the Configuration tab**

 Important. A new milestone.safe module is delivered since Milestone 2019 R2 with its identity server: follow the special configuration instructions in the Configuration tab.

Go to the article for installing Evidian SafeKit with the latest version and the latest step-by-step installation instructions.
