Minimum Hardware Specs to Install Live Earth

Operating System
Windows 10™ 64-bit. *You will need the most recent Windows update and will also need to enable .NET Framework 3.5 to install Live Earth, otherwise the installation will not complete. Please reach out to JRoss@LiveEarth.com for any technical questions or issues.*

Processor
Quad Core Intel Processor i7, 4th Gen or newer

Graphics Card
Dedicated NVIDIA video card 960+ or 1060+ with at least 2GB of RAM

Hard Drive
Good: 500GB 7200 RPM Drive
Ideal: 256GB SSD with 120GB of free space + 1TB rotating platter for long term storage

RAM
16GB or more

Touchscreen
1920x1080 with multi-touch capabilities
Recommended: 3M™ Multi-Touch Displays (larger than 22 inches), Microsoft HUB, Ideum Touch Tables

Other Input Devices
Live Earth is intuitive to use on a touchscreen and it also supports input from a standard mouse & keyboard, SpaceMouse® and Xbox® controllers for navigating more complex 3D scenes.
