

SENSITIVE SITES VIDEO SURVEILLANCE AND INTRUSION DETECTION CONTROL

Multidisciplinary complex project of video surveillance and physical intrusion detection sensors for an important large public Italian company in the Finance Market.

Main technological solutions on **12 buildings, including three vaults**, on a large campus:

Realization of **physical infrastructure** through wiring, excavation and installation of conduits, plinths and piling support and realization of server rooms and control rooms including videowalls. **More than 500 videocameras and 1.000 sensors** (anti-panic button, intrusion detection sensors, barriers and so on...).

Video surveillance system in Milestone technology.

IP LAN network infrastructure in Cisco technology.

Image storage system and video recordings in DELL EMC technology.

BidEye for interfacing non-homogeneous environments to allow the management of Satel intrusion detection sensors from the centralized video surveillance management system.
