

Ai-RGUS

NO CAMERA LEFT BEHIND™

LET US BE YOUR

BUSINESS BOOSTER

Integrated with:

WHO WE ARE?

We are AI software manufacturers for security camera systems. Our purpose is to empower system integrators with tools to monitor that their clients' camera systems are working as intended.

WHAT WE DO?

We offer a unique RMR opportunity by automatically finding camera system problems before your customer knows about them. This strengthens your brand name and makes your business more profitable.

RMR OPPORTUNITY

Diagnose camera system problems such as bad camera views or missing recordings that were not possible before & remediate cybersecurity issues, while adding to your bottom line.

ADDITIONAL SERVICE CALLS

Rather than wait for a phone call from your customer, you can be pro-active about their maintenance and do so efficiently

ADD TRUST

Design camera systems with camera specific health monitoring software to add peace of mind to your customer that the system is working as intended

Ai-RGUS

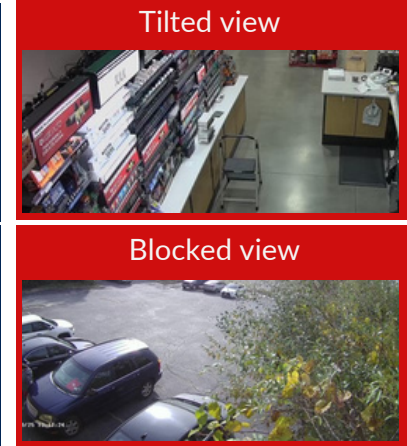

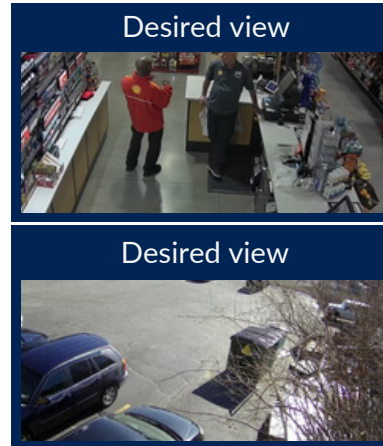

NO CAMERA LEFT BEHIND™

Build recurring monthly revenue from maintaining the operation and cybersecurity of your client's camera systems using Artificial Intelligence software

Camera view health

AI software that detects camera view problems so you can be sure your camera sees and records the images you expect to have and otherwise, receive alerts.

Incorrect field of view • blocked view • tilt • blur • glare • low-light • feed not live

Ai-RGUS: a 100% software solution that is **simple** to deploy, **easy** to use, and **cybersecure**

Camera system health

Automated alerts that notify you of issues, actionable reports to review system performance over time, & reboot cameras.

Camera / device liveness • is camera producing an image • too few days of recordings per camera • hard-drive problems • timestamp correctness and more

System Performance Report

Device name	Live	Recordings		AI-based image rating	Additional issues
		3 hours	45 days		
Cam: South Lot 2				Tilted	Clock 5 mins early
Cam: Workshop 5					
Cam: Counter 1				Blurred	Password expired
NVR: Slots		Bad Sector			Wrong time zone
VMS: East Hall					

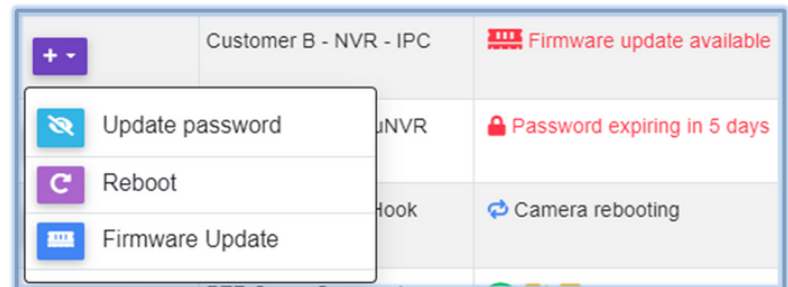

Camera systems reduce liability, do not let it become a liability!

Cybersecurity Management

Manage firmware versions of camera assets and apply bulk updates automatically. Set policies for camera password expiration and complexity.

Bulk update firmware versions • bulk update camera passwords • expired passwords notifications and more

Management from online dashboard
