

**AIRGUS** AUTOMATICALLY finds cameras with an unusable surveillance image & notifies you!

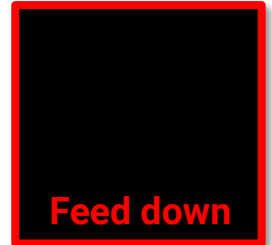

**With AIRGUS**

**Perfect Picture**

Get results, save time & money:  
 Allow AIRGUS to find unusable surveillance images

**Without AIRGUS**

**Unusable Picture**

Camera images go bad at a rate of 1% each week

**Risk Reduction Greater than \$1M:**

The payout in 31% of on-premise security negligence cases, including camera negligence, is higher than \$1M! Can you afford to not capture the image because of an issue to the camera that was not noticed or fixed? How much does it cost you NOW to have someone search through your cameras manually to find problems? Do you have anyone checking the camera views daily? Are they missing cameras? What is this costing you?

**AIRGUS BENEFITS**

**Automated Alerts**  
 No camera view surprises

AIRGUS uses automated alerts to let you know when your camera image changes due to Blur, Tilt, Glare, Tampering, Obstruction, Low-light or Feed down

**Always Running**  
 Cameras Checked Consistently

AIRGUS runs automatically and in the background, so you have peace of mind that cameras are regularly checked with a consistent level of quality- even on holidays and weekends!

**AIRGUS ADOPTERS**
