

Testimonials

We spoke with our customers and many potential clients; many problems occur with camera views:

“ During renovations, 100's of cameras were painted over and we didn't know it for weeks ” - Casino chain in Las Vegas

“ Our cameras in the parking lots vibrate and tilt the cameras ” - Duke University, Elon University

“ Our customers complain about bugs nesting inside the camera dome and blocking the view ” - ExacqVision

(Video Management Software Company)

“ Maintenance moves furniture around and sometimes a bookcase ends up blocking the camera view ” - Town of Chapel Hill

To solve all these problems and many more, the AI software **AIRGUS** is offered to make sure the camera view is available when you need it, especially after an incident occur. Incidents such as: slip and fall (real or fraudulent), theft, loss prevention, warehouse accidents, employees and / or clients claims for \$, and many more.

Therefore, Duke University uses **AIRGUS** since 2017. When they started the use of **AIRGUS**, they owned only 1,100 cameras, but they were able to quickly almost double their cameras thanks to **AIRGUS**. Now, with their 2,000+ cameras, they told us:

“ We spend on average 5 minutes/day inspecting our 2,000+ cameras thanks to **AIRGUS** ” - Duke Office of Information Technology

The City of Durham shared with us:

“ **AIRGUS** helps us resolve both short-term camera view problems and gradual camera degradation ” – Durham Facilities Management
