

Integration solution for OPTIMA Box

INOVALINK FOR EDEN ACCESS

Easily connect your OPTIMA Box to your VMS

Novanetworks InovaLink FEA (For Eden Access) is a plug-in that allows you to easily connect your OPTIMA Box Eden Innovations to your Milestone XProtect software (from the Express+ version). By simplifying the connection between the alarms generated by OPTIMA Box and the events of the XProtect VMS, Inovalink FEA transforms your VMS into a centralization tool for all your electronic security systems.

Very easy to configure and administer, flexible and scalable by upgrading and adding services, InovaLink FEA provides administrators with precise management of events generated by OPTIMA Boxes, LIGUARDs and connected readers.

Quickly and efficiently process the events generated by your access control!

With InovaLink FEA installed in Milestone XProtect, operators manage from a single interface all events recorded by your access control and video surveillance systems.

- Integration of Eden Access elements in a map,
- Opening and blocking doors from a map,
- Association of images with access control events.

Thus, operators can easily and quickly obtain an optimal view of events, precisely remove doubts, and intervene effectively..

Boost your Milestone XProtect system!

 A software that is easy to manage and operate

 A practical connection between access control and videosurveillance

 Optimized for small to medium infrastructures

 A performing, simple and economic solution

 Waive doubts quickly and efficiently
