Video Wall Management

INOVAWALL

Dynamic features, easy to install and manage...

Novanetworks InovaWall offers a straightforward approach to video wall systems management. This plug-in, fully integrated into Milestone XProtect, allows video surveillance operators to choose which cameras to display and configure their arrangement in any monitor of the video wall, all from a centralized interface.

Simple to configure and operate, flexible and scalable through upgrades and services, InovaWall provides administrators with adaptable and precise role management.

Quick and efficient event resolution !

With InovaWall installed in Milestone XProtect, operators can easily, using role management, handle the cameras display and their disposition in monitors in a video wall:

- Choice of displayed cameras and positioning in the video wall monitors by a simple drag & drop operation,
- Camera management in each monitor,
- Edit video wall monitors layout with preconfigured layouts.

Hence, operators can easily and quickly obtain an optimal view of events, carry out precise actions to waive any doubts, and intervene effectively.

Boost your Milestone XProtect system !

- A software that is easy to manage and operate
- Preconfigured layouts for convenience
- Optimized for small to medium infrastructures
- A performing, simple and economic solution
- Waive doubts quickly and efficiently

INOVAWALL

3 scalable service levels to meet all needs

Inovawall is a video management plug-in for Milestone XProtect. A InovaWall license enables the management of a video wall with 4 monitors. The license extension increases the number of supported monitors by multiples of 4, depending on the capabilities of the server on which the system is installed. InovaWall is compatible with all brands and models of professional monitors.

| LICENCES INOVAWALL	BASIC	PLUS	ADVANCED
Drag and Drop Cameras	✔	✔	✔
