

Solution Overview

Dragonfruit's unique modular approach provided BAPS a powerful on-demand analytics solution integrated with their existing VMS. BAPS deployed the Forensics Investigations, Summaries, and Search Modules within days, as no new hardware was required. The pay-as-you-go subscription model provided them the flexibility and affordability they needed.

Benefits

EXTREMELY COST-EFFECTIVE

Affordable, pay-as-you-use subscription pricing let BAPS call in functionality they needed at a moment's notice.

NO NEW HARDWARE REQUIRED

Dragonfruit overlaid onto existing BAPS infrastructure – with no additional hardware or onsite installation – within days, during the height of COVID-19.

POWERFUL AI ANALYTICS

During PoC testing, Dragonfruit's AI excelled in performance, e.g. by detecting people at over 200 feet on a 4K sensor.

FAST DELIVERY TURNAROUND

Dragonfruit delivered software enhancements requested by BAPS overnight or within days, showcasing their technical depth and customer-focused culture.

"One of the biggest challenges when deploying advanced AI technology is the expensive upfront cost of hardware infrastructure – processing power – CPU / GPU, etc. With Dragonfruit, we were able to add a layer of advanced AI on top of our existing infrastructure with no additional hardware or capital expenses within four weeks of proof of concept testing. The unique integration with Genetec Security Center allows us to aggregate camera sources from multiple locations on demand for AI processing as needed in a simple, easy to use browser-based interface."

About BAPS

The BAPS Swaminarayan Sanstha® (BAPS) is a worldwide spiritual and humanitarian organization with 3,300 international centers dedicated to community service, peace, and harmony. Through various spiritual and humanitarian activities, BAPS endeavors to develop better citizens of tomorrow with high esteem for their roots and culture.
