

Eviden Computer Vision Platform

The highly scalable end-to-end computer vision platform

The problem

Today, 95% of data is non-analyzed and 80% of this non-analyzed data are images and videos. Analyzing this complex and voluminous data in real time can be a burden.

Analysing this data in real time can on the other hand improve safety, security, advance operations and provide value propositions across verticals.

The solution

Eviden Computer Vision Platform
Powered by AI Video Analytics
(VISuite and BullSequana range)

Full End-to-end solution:

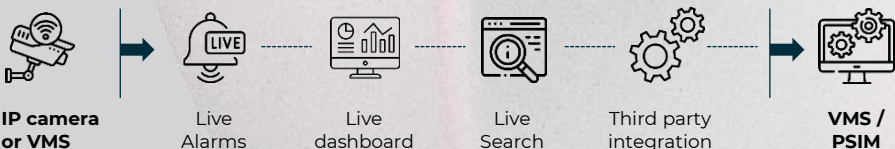

Hardware & software platform providing pre-trained & customizable AI models supporting various value propositions and verticals

VISuite Application

Perimeter Protection
Intrusion Detection
Traffic Management
Crowd Management
Operations Management
Forensics and Investigation

1

How does it work?

Value Proposition

2

3

Use Case

- Smart Cities
- Airports
- Oil & Gas
- Stadiums
- Roads & Rail
- Datacenters
- Energy & Utilities
- Healthcare
- Seaports
- Warehouses
- Manufacturing
- Petrol Filling Stations
- Prisons
- Retail
- Education

AI Technology (Custom built by Eviden & Partner)

4

EVIDEN
an atos business

5

The Hardware

Hardware Products and Services

Cloud & Technology Partners

BullSequana ES
Plug-and-play analytics in a compact and ruggedized server

BullSequana Edge
AI inference outside the data center

BullSequana EX
Envision trusted AI from edge to cloud

BullSequana SA20G
AI inference and training in the data center at edge

BullSequana X451
High performance and computing for AI training and inference

The Expertise

6

140+
Airport Projects

110+
Retail Projects

600+
Petrol Stations

50+
Nuclear, Oil, Gas & Energy Projects

160+
Government, CNI and Smart City Projects

7

Why Eviden Computer Vision?

51K+
Business & Technology Experts

Forged over 50 years Industry Expertise

70+ Countries
Global Patent Portfolio

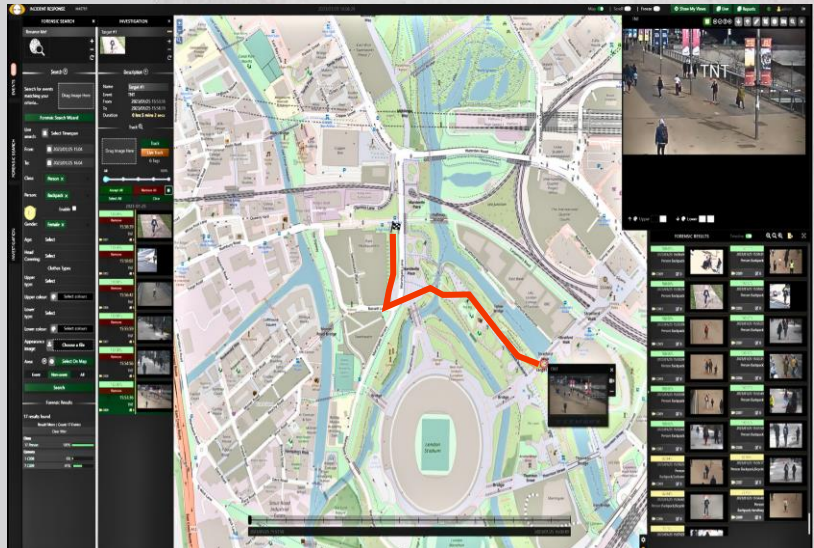

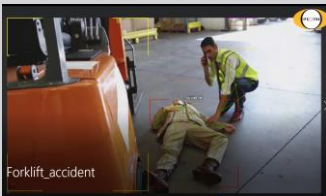

#1 Security
Provider with 16 Global Centers

Focus on Cloud, Digital & Security Solutions

Recognized by global market analysts
