

Latest Alarm™ Plug-in for Milestone XProtect Smart Client

“Before-and-after” video loop persistently plays the most recent XProtect alarm...
as it occurred.

Latest Alarm Screenshot

- Automatic, "hands-free" video loop activation: Ideal for Smart Walls and "heads-up" displays.
- Display settings are adjustable: Stretch to fit screen, set video loop duration.
- Keyword Filters: Specify which alarms or alarm types are displayed.
- Snapshot Option: Display embedded JPEG images included in alarm messages from some third-party systems.
- Easy setup: Toggle loop, live, or snapshot view; adjust aspect ratio.

The Latest Alarm™ Plug-in is hands-free, requiring no user action to display the video loop. An excellent addition to Smart Walls and Smart Client "heads-up" displays or where visual cues are used to indicate incoming alarms.

Setup is straightforward and simple. Specify a desired video loop duration (default is 7 seconds before event, 8 seconds after) and select whether you want to stretch or fix the aspect ratio.

Keyword filtering activates the video loop for only certain alarms or alarm types.

With the Latest Alarm™ Plug-in, never miss an alarm and always see what happened as it occurred.
