

PERCEPT

Expand your senses.

INNOVATIVE

Wearable IoT Solution.

The IONODES PERCEPT body camera is more than just a wearable camera, it's a complete IoT-connected multi-sensor device. Extensive remote networking capabilities allow you to interact with the camera through 4G LTE and/or Wi-Fi networks. On-board capabilities include world-leading 180° immersive video capture at up to 4K resolution, bi-directional audio, GNSS tracking, high-performance Qualcomm™ processing and a true open-platform API for ease of integration into any management software solution.

See more, see better.

Record critical video events in high resolution and never miss a detail through a Panomorph lens with 180° field of view. Panomorph lens technology offers exceptional level of detail from the center of the image to the edge, as opposed to traditional fisheye lenses.

Combined with market-leading hi-resolution video, H.265 / HEVC video compression and motion-based image stabilization the video quality is simply the best you can get from a mobile wearable device.

Embedded QR Codes – Every video frame includes watermarked metadata such as GNSS position, wearer ID and 9-axis motion information.

Image Stabilization – A 9-axis motion sensor captures real-time orientation and acceleration of the camera, allowing for accurate image stabilization.

High Quality Video – Panomorph lens technology provides a higher level of detail across the entire 180° field of view when compared to standard wide-angle or fisheye lenses.

KEY FEATURES

Designed for real-time applications.

Live Connectivity

Always-on networking through 4G LTE or Wi-Fi allows for live remote access to the camera for alert notifications, live streaming and remote control.

Flexible Recording

On-board recording functions allow for local recording to secure flash storage as well as automated upload to on-premise or cloud-based VMS solutions.

Location Tracking

Accurate GNSS positions can be captured, streamed and recorded, allowing for complete control over device location tracking functions.

Task Optimized

Built tough, the camera is designed to operate in harsh environments and power optimizations allow it to be used during entire work shifts (+12H) without compromise.

INTEGRATIONS

Open Platform.

Integrate your fleet of wearable IoT devices into your existing VMS solution, seamlessly.

The IONODES PERCEPT body camera is designed to be integrated into practically any software solution, on-premise or cloud through ONVIF, the global open standard for IP device integration. ONVIF Profiles G, S and T compatibility enables virtually limitless control over configuration, media streams, events, metadata and recorded content.

Protecting your investment.

PERCEPTCARE is a complete maintenance package that includes software upgrades, extended hardware warranty and premium support.

Software Upgrades

With access to all software upgrades, get peace of mind knowing your system will always be running the latest releases, securing the value of your investment. Benefit from new features, improved performance, enhanced usability, security updates and expanded 3rd-party integrations.

Extended Hardware Warranty

PERCEPTCARE provides priority coverage for your PERCEPT Body Cameras, ensuring your systems are up and running when you need them. Benefit from a hardware warranty that lasts for as long as you need it, with access to priority device replacement.

Premium Support

Stay focused on your operations knowing our team of experts is here to make sure you get the support you need, when you need it, to keep your solution running at its best. Benefit from priority phone support, named customer success manager and 3rd party integration support.

Freedom of movement.

The PERCEPT Cloud Solution is a secure and reliable on-demand live video streaming and storage solution accessible from anywhere, anytime via web and mobile apps. Offering direct camera-to-cloud connectivity, the PERCEPT Cloud Solution is a complete camera management solution offering innovative features such as real-time location tracking, centralized camera control and configuration. Combined with the PERCEPT Body Camera's Wi-Fi and LTE connectivity options, the PERCEPT Cloud Solution can easily adapt to any deployment scenario.

PERCEPT CLOUD

PERCEPT-DCK1

Single Port Smart Dock

Supports QuickCharge 3.0, up to 2A charging

Dynamic auto-switching between charging and data upload

Compatible with Onvif "Trickling" modes

Auto MAC address bridging between Camera and Dock

Gigabit Ethernet, allows for video offloading at up to 300Mbps

Innovative solution for wide-ranging applications.

Solving Industry Challenges

A growing number of private and public organizations are looking towards wearable cameras as a means to improve safety, enhance security, optimize business processes and provide transparency.

The inclusion of a live-accessible body camera in day-to-day operations can help solve operational challenges by providing real-time feedback and situational awareness. Typical applications include private security, public safety, manufacturing, logistics and transportation services.

Market Driven Design

Designed as a ruggedized open platform device, the PERCEPT Body Camera boasts the durability, flexibility and performance needed to address the needs of a wide range of applications in a diverse set of markets.

The use of Qualcomm™ technology, global leader in mobile processors headquartered in North America, ensures compliance to multiple worldwide government regulations restricting the use of foreign technology in specific markets and applications.

PERCEPT-BC100 Technical Specifications

Networking	3G / 4G LTE (Dual-Sim Supported)	North America LTE-FDD: B2/B4/B5/B7/B12 to B14/B17/ B25/B26/B66/B71 LTE-TDD: B41 WCDMA: B2/B4/B5
		EMEA / LATAM LTE-FDD: B1 to B5/B7/B8/B20/B28 LTE-TDD: B38/B39/B40/B41 WCDMA: B1/B2/B4/B5/B8 GSM/EDGE: 850/900/1800/1900MHz
Camera	Wi-Fi	2.4G/5GHz, 802.11 a/b/g/n/ac
	Bluetooth	BT 4.2LE
	Still Image	Image capture at up to 8.3MP (JPEG)
	Video	4K (8.3MP) / 6MP / 4.2MP / 2.3MP / 1MP / 0.6MP at up to 30 FPS; H.264 / H.265 HEVC compression
	Lens	Type: Panomorph, 180° Horiz. / Vert. Field of View Focus range: 24 inch to infinity
Audio	Watermarking	Data in picture includes date, time, GNSS position, Wearer ID and 9-axis motion for ROI stabilization
	Microphones	Dual microphones / left and right AAC audio compression
	Speaker	Speaker output / 1.3W max. power
USB	USB Type-C	Supports Quick Charge 3.0 / max. 2A charge current Data transfer via optional charging dock
Sensors	Motion Sensing	9-axis, accelerometer, gyroscope and magnetometer
	Haptics	Vibration feedback on commands and alerts
Indicators	Status LED	Top facing and front facing RGB status LED
	OLED Display	0.9 inch, top facing, 128 x 32 dot OLED display
Positioning	Satellite Positioning	GPS / BeiDou / GLONASS
Storage	Internal microSD	64GB
Recording	Post Event	Configurable, up to 300 sec. post
	Types	On-Alarm and on-demand
Auxiliary	Flashlight	1 Watt front facing white LED light
Battery Pack (Li-Po)	Capacity	6,000 mAh
	Operating Time	Up to 16 hours depending on configuration
	Charging Time	<= 4 hours
Integration	Supported API's	ONVIF Profile G, S and T IONODES ION API (HTTP-based RESTful API)
Compliance and Certifications	EMC / ESD	FCC part 15 subpart B, ICES 003 Class B, EN 55032 Class B, EN 55035, EN 61000-6-1, EN 61000-6-2, EN 301489-1, EN 301489-17
	Safety	EN 62368-1, NOM (Mexico)
	Environmental	Shock, water and dust resistant
	Operating. Temp.	-20C to 50C (-4F to 122F) <i>When charging: 5C to 35C (41F to 95F)</i>
	Storage Temp.	-20C to 45C (-4F to 113F) for less than 30 days -20C to 35C (-4F to 95F) for longer than 30 days
Mechanical	Dimensions	95mm x 65mm x 35mm
	Weight	155g (including 6,000 mAh battery)
Accessories	Standard	Klick Fast belt clip, USB-C cable
	Optional	Klick Fast mounting accessories
	Power adapter	Not included. Use provided USB-C cable to connect to a Quick Charge 3.0 USB charger or use a PERCEPT docking station.
Warranty	Standard Warranty	2 Years
