

Xprotect as Supervisor Configuration

Once properly configured, XAtlas and XProtect automatically update in both directions, maintaining aligned common information.

In this scenario, XAtlas does not require specific configurations to interact with video surveillance system. All the configurations must be done through Milestone system

Xprotect as Supervisor Configuration

The interface configuration is performed on the XProtect Management Application, That is principally done by:

- Definition of XAtlas references
- Association of camera(s) with Access points
- Definition of Actions upon Events from the ACS

Access control actions

Specify the settings for each action you define.

Enable	Triggering Event	Source	Time Profile	Action
<input checked="" type="checkbox"/>	Access request	All doors	Always	Display access n
<input checked="" type="checkbox"/>	Transaction not performed	XP-GLASS1_GATE	Always	Go to PTZ prese
<input checked="" type="checkbox"/>	Transaction	XP-GLASS1_GATE	Always	Display access n
<input checked="" type="checkbox"/>	Transaction	XP-GLASS2_GATE	Always	Go to PTZ prese
<input checked="" type="checkbox"/>	Transaction not performed	XP-GLASS2_GATE	Always	Start recording
<input checked="" type="checkbox"/>	Transaction not performed	XP-GLASS2_GATE	Always	
<input checked="" type="checkbox"/>	Transaction	FE-DOOR_GATE	Always	
<input checked="" type="checkbox"/>	Transaction not performed	FE-DOOR_GATE	Always	
<input checked="" type="checkbox"/>	Transaction not performed	FE-DOOR_GATE	Always
