

A Milestone System Builder Tailored Solution Debut By Promise

A new architecture for hardware and infrastructure platforms. It allows us to design/build/ship hardware with pre-installed Milestone XProtect VMS, and extend our market reach to scale out the adoption of latest Promise video technology platforms.

Promise Technology and Milestone have partnered to develop joint solutions for middle market that are proven to work optimally across hardware and software, with a complement of services. The industry-leading combination of Promise Vess Series for Milestone innovative video technology accelerates faster decision making by giving partners and clients the ability to rapidly deployment and achieve faster time-to-value across solutions, while significantly reducing total cost of ownership (TCO)

Faster. Better. Simpler.

- **Optimized for speed**

The solution allows you to streamline common tasks and manage your recording environment more effectively.

- **Purpose-built for efficiency**

Promise Intelligent Vess Series with Milestone brilliant VMS provides more reliable and predictable performance with robust systems that are purpose-built and optimized for recording environment with high availability and enterprise data protection features.

- **Built-in simplicity**

The joint solution of Promise and Milestone reduces complexity and simplifies manageability, and letting clients stay focused on driving business value.

Bringing Innovation To The Middle Market

Essence of System Builder Program

By preloading Milestone XProtect Essential+ Video Management Software (VMS) on Promise Vess A-Series. The well-rounded platform gives you instant access to huge volumes of video data as it is accumulated, without complex layers of data management and storage getting in the way. This calls for an optimized environment that can scale performance, manage data efficiently, as well as operate reliably while saving costs, in a holistic, solution-based manner.

PROMISE SMARTBOOST™ Technology

- Optimized Write for Recording.
- Stabilized Recording when RAID is Critical/Rebuilding.
- Predictive Read for Playback.
- Service Continuity.
- Minimize CPU usage for Storage.

Vess A3340-SBP

Verified by Milestone

Industry's Highest Performing Appliance

- Reduced hardware cost
- Reduced operations & maintenance cost

Ease of Installation & Management

- Reduced installation & operational costs
- Ability to seamlessly grow the solution

High solution flexibility

- Ability to meet specific customer needs
- Wider set of integration possibilities via MIP

High cyber security

- Increased protection against internal and external cyber security threats
