Overview

MIP Plugin for automatic opening of floating windows containing video streams of cameras linked to Alarms.

Copyright, Trademarks and Disclaimers

Copyright

© Copyright SecurSys 2019-2020. All rights are reserved.

Disclaimer

This document is intended for general information purposes only of the Plugin and its application to the Milestone XProtect Platform, of which at least basic knowledge is required.

Any risk deriving from the use of this information and/or the Plugin itself is the responsibility of the recipient who cannot in any case claim the Manufacturer.

All references to systems, people and organizations used in the document are dummy and any resemblance to real situations is purely random and unintended.

SecurSys reserves the right to make changes to the Plugin without notice.

Licensing

License management complies with the requirements of the Milestone Licensing Framework; therefore, the specific license represents an extension of the basic license of the Platform (SLC).

The licensing scheme is based on the amount of concurrent Smart Clients.

Design

The Plugin operates only in the Smart Client background environment without any UI, when it receives an Alarm from the Event Server, it reads the list of associated cameras and shows them, live and playback, in a floating window.

Requirements and Considerations

As indicated in the previous point, there are no particular requirements to be met.

Installation

The plugin consists of only 2 files, Plugin.def and AlarmWindows.dll, and does not have its own installation procedure.

Configuration

The plugin has only one configurable option (Checkbox) via the Management Client.

Optimization

There are no parameters to optimize the Plugin's operation.

Operations

All activities are carried out automatically without any need for intervention by the operators.

Troubleshooting

There are currently no known issues.

ABOUT SECURSYS SAS

SecurSys S.a.s. is an Italian Company that operates in the fields of Technological and Security Systems by providing specialized design services, tender support, start-up support and training as well as SW Developments, mainly dedicated to the interfacing and/or integration of various systems and components on the market.
