# SMART SOFTWARE CONTROL ROOM

The Control Room software package for Milestone XProtect.

ENHANCE YOUR MILESTONE SOLUTION!

## Sometimes the customer needs a little bit more

If your Milestone installation includes a control room, where guards sit and actively work with the system, Smart Control Room adds many needed features to your XProtect solution. The comprehensive software package provides the functionality needed and which every operator is used to work with in his daily routine.

Used in installations around the world the Smart Software Control Room solution was developed over the last decade. It is a solution build from operators for operators.

Features:

- Alarm pop-up windows
- Video matrix functionality
- Flexibel operating Interface
- Multimonitor - Multiscreen configuration
- External Smart Client control
- Status information display
