

# Municipal Marine Boat Yard

**Application:** Protect perimeter of boat yard from intruders directly located next to residential and public areas. Trigger PTZ cameras to track intruders if they penetrated the fenced area

**Challenges:** Account for seagulls and marine environmental conditions. Detection zones changes due to activity

**Redscan Settings:** Adjust sensitivity and built-in detection modes to allow seagulls to freely pass through detection areas without causing alarms while detection people. Set up environmental settings to adjust to rain and snow. Set up auto-tracing feature that resets alarm area when detection field of view changes.

**Total amount of Redscans: 20 units**

**Integration: Milestone XProtect Corporate**
