

- Unified Security monitoring and analysis platform makes XProtect the ideal head-end.
- All Access Control events are time synchronized with your networks video surveillance system.
- Real-time onscreen access control activity provides pop-up alerts when user defined events occur.
- Powerful Hypermedia Search Engine links all text received with all stored surveillance video.
- All badge swipes and access control system level events are stored and searchable.
- User defined real-time event notifications can be sent as Email and SMS alerts via generic events.
- Export search engine table as CSV files
- Report Manger spreadsheet provides a simple one-click selection of an event bringing up detailed parameters of the event along with the associated video(s).
- Export recorded video evidence directly from the Report Manager's audit entry table.

Report Manger provides results of audit investigations based on user defined Rules, user defined Pop-up comments and allows annotation of audit status of events.

Alert Manager adds Pop-Up events to push alerts to the client in real time and puts operator's comments into the Audit table.

Export video of events using Video DB Export tool.

Playback video of the event, add alternate camera views if needed and set status of event all from the audit entry table.

(Type|contains|alarm):
