

- Bring Facial Recognition seamlessly into XProtect.
- Improve security and prevent crimes by knowing in real time who is entering specific areas in your facility, such as: recently terminated employees returning to work, restraining order alerts, a person of interest, etc. along with the associated video.
- For hotels, casinos and restaurants incorporate the ability to identify your most valuable clients immediately and respond to their needs intuitively.
- Alert security in real-time with actions to take by pushing company approved standard operating procedures to the screen when an event occurs.
- Use face recognition up front in retail as an obvious deterrent or employ a more subtle and strategic deployment.
- User defined Pop-Up alerts require security personnel's immediate response to urgent events.
- Pop-Up alert screen allows security to enter comments relative to the event on screen and those comments become a searchable item.
- Send Email and SMS alerts via generic events to designated personnel when predefined events take place.
- Export facial recognition events to a CSV file format with a single mouse click.
- Display events in graphical form for easy visual interpretation showing trends of events. Ex: individual showing up repeatedly at specific locations when other events occur.
- Conduct Audit investigations and export video evidence from one easy to use spreadsheet.
- Alert Manager enables audit investigations to be conducted based on user defined rules associated with suspicious activity.

Hypermedia Search Engine finds events and recalls the associated video

Select search parameter from drop down tab.

Qualify your search with equal to, not equal to, contains, etc.

Setup your spreadsheet columns using either default settings or add or delete columns.

Select Download to export data in CSV format to a spreadsheet where you can create a visual representation of the data.

Use full or partial keywords from metadata to setup the search.

Filter your search by adding multiple keywords.

Once your search parameters are defined select view to present results in table.

Add new columns to your spreadsheet using drop down menu.

Alert Manager adds Pop-Up events to push alerts to the client in real time and puts operator's comments into the Audit table.

Export video of events using Video DB Export tool.

Playback video of the event, add alternate camera views if needed and set status of event all from the audit entry table.
