

- Track a person of interest
- Live camera views of the area
- Alert Message on screen
- Map showing area of Detection
- Description of Person

- Track a person of interest using CyberExtruder's facial recognition system and Milestone's XProtect.
- Improve security and prevent crimes by knowing in real-time who is entering your facility, where they were last seen and have a map showing the point of detection.
- Applications in areas such as: schools, corporations, airports, train stations, shopping malls, etc.
- Focus can be: recently terminated employees returning to work, restraining order alerts, a person of interest, etc.
- For hotels, casinos and restaurants incorporate the ability to identify your most valuable clients immediately and respond to their needs intuitively.
- When detection is made, Security personnel can be provided with company approved standard operating procedures to follow and actions to take.
- User defined text Pop-Up alerts are included with the advanced tracker integration requiring security personnel to acknowledge the current event.
- Pop-Up text alert screen allows security personnel to enter comments relative to the event on screen and those comments now become a searchable item in the Hypermedia Search Engine.
- Send Email and SMS alerts via generic events to designated personnel when predefined events take place.
- The Alert Manager permits audit investigations to be conducted based on user defined rules associated with suspicious activity.
- Report Manager enables a search on any piece of received metadata, combined with a range of time and location using easy to use drop down menus all time synchronized with its recorded video.
- Add additional camera views during your forensic investigation to bring in alternate views of an event where the additional cameras will become time synchronized with the event of interest.

Alerts are presented in spreadsheet format and hyperlinked to the recorded video.

Export spreadsheet in CSV format

Audit Manager displays Rules that you defined

Set Event Status classifications as Critical 1, Critical 2
