

- Integrate your weigh station system with XProtect establishing a Unified Security monitoring and analysis platform making your video management system (VMS) the ideal head-end.
- Improve operations by having retail point of sale or commercial scale transaction information recorded along with video of all weigh scale events and weigh scale operators.
- Be notified in real-time when weights are exceeded. For retail business this can be item weight or for commercial applications this can be waste material needing special handling - such as: domestic, commercial or hazardous waste is being brought to a transfer station.
- Send Email and SMS alerts to designated personnel when special handling is required.
- Quickly recall weigh scale events along with video of those events by using C2P's a drop down menu to select a combination of search parameters, which can include: Operators name, employee number, scale number, docket number, item description, date, and time, or event. Plus have access to any video within your network.

ABBIE LANE

Site: Omara Road - INBOUND GREEN WASTE(DOM)

Procedure - 3/17/2017 10:24:47.650 AM

Waiting for input

Select search parameter from drop down tab.

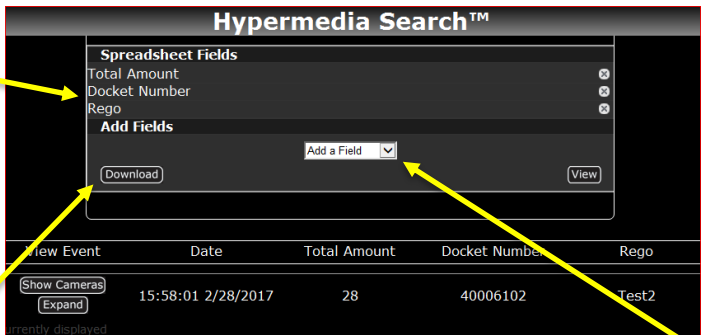

Use full or partial keywords from metadata to setup the search.

Qualify your search with equal to, not equal to, contains, etc.

Filter your search by adding multiple keywords.

Setup your spreadsheet columns using either default settings or add or delete columns.

Once your search parameters are defined select view to present results in table.

Select Download to export data in CSV format to a spreadsheet where you can create a visual representation of the data.

Add new column headings to your spreadsheet using drop down menu.
