

OPEN ARCHITECTURE SOFTWARE
SEAMLESSLY INTEGRATED WITH
SMART IP VIDEO SURVEILLANCE

ABOUT EINS

EINS is a leader in the Access & Identity Management segment, offering various products to suit the changing needs of technology driven clientele. With Technical Expertise on .Net Platform, We Develop Software on Different Platforms like Server – Client, Web Based, Hybrid Architecture & offer specialized Solutions in Access & Identity Management solutions which are unmatched and continuously evolving with time.

Our Software & Hardware are designed to seamlessly integrate with new & existing IT and operational systems and to automate manual processes in order to reduce both costs and risks.

MILESTONE INTEGRATION

EINS Security Management & Milestone's Video management software (VMS) provide a powerful access control and video surveillance integration, through a single user interface inside EINS – Enterprise Edition, EINS – Ultimate Edition & EINS – Residential Solution. End users no longer need to open up multiple applications to monitor alarms and video in system-specific monitors.

Milestones Video Management System provides extensive compatibility with a variety of IP cameras, encoders and digital video recorders. Uniting access control and video for monitoring access events and controlling access points creates many advantages for customers.

The integration creates more efficient work processes, so that operators can manage video and access control from a single interface and manage security effectively & efficiently.

Key Features :

- ▶ Configure and execute actions on motion alarmed cameras
- ▶ Switch between live and playback modes for selected cameras
- ▶ Import all cameras set up in the Milestone VMS with a single click of the mouse
- ▶ Take a 'snapshot' and email it as evidence
- ▶ Associate access control alarms with digital video footage
- ▶ Live video feed activated directly from EINS Security Hub application
- ▶ Live video pop-up based on alarm priority or time
- ▶ Real time visual tracking and recording during alarm conditions
- ▶ Camera icons can be positioned in EINS Security Hub alongside access control readers
- ▶ Display up to 16 individual camera feeds simultaneously in a single screen virtual matrix
- ▶ Adjust camera pan, tilt, and zoom via integral software control
- ▶ Take Live Video snapshots
- ▶ Export recorded footage to file
- ▶ Support Failover configuration
- ▶ Display live video on defined Smartwall component
