

milestone

SpotterXP

What do you get when you merge the industry leaders of **radar surveillance** and **video management**?

Introducing SpotterRF with the **SpotterXP** plug-in

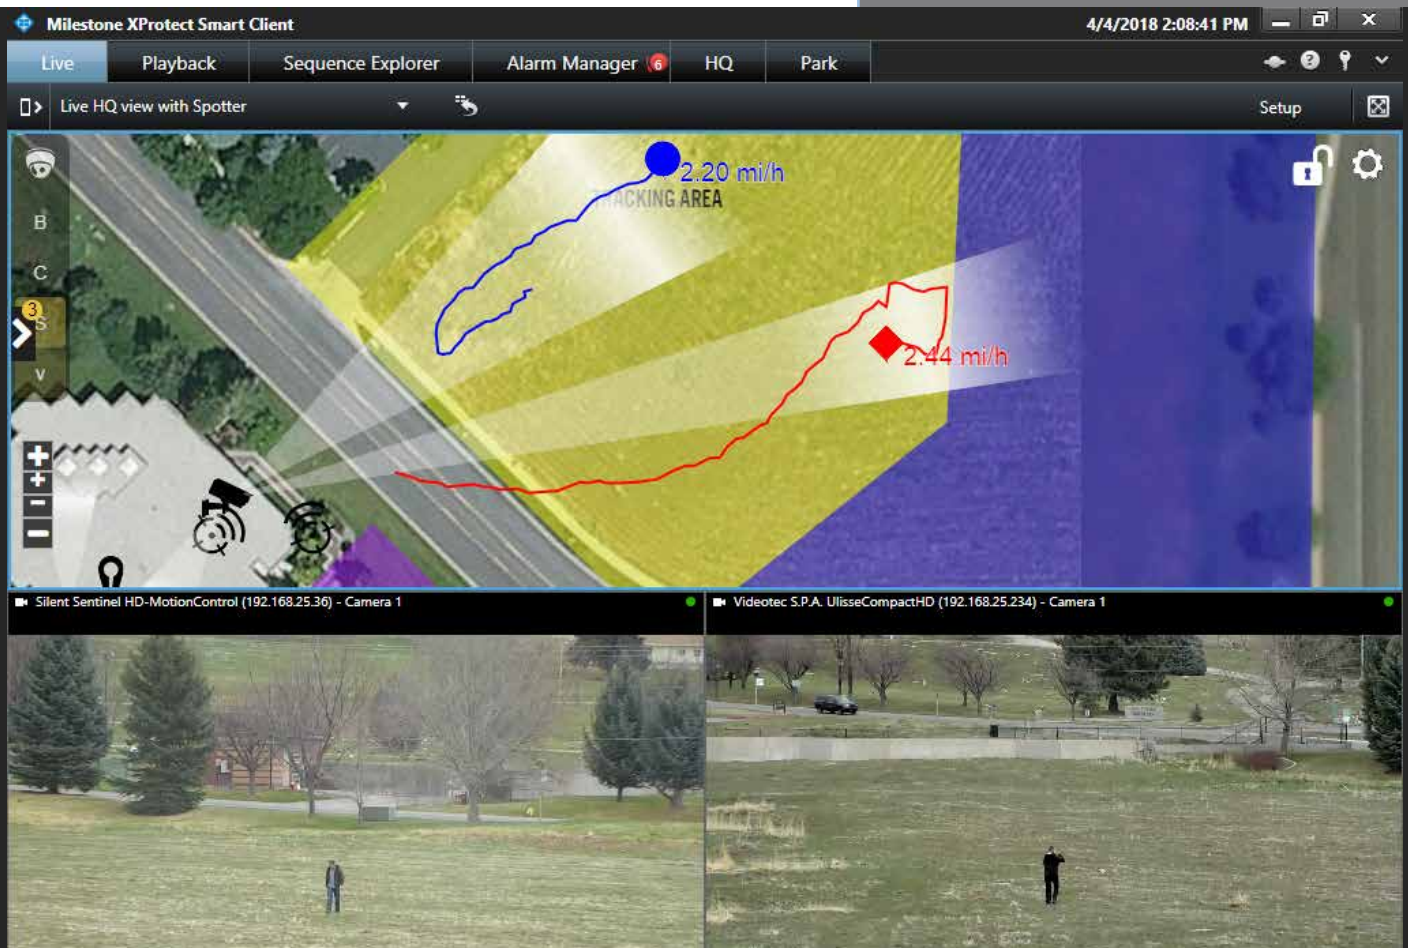

Benefits of using Milestone:

- Highly customizable views of video/event content to facilitate ease of response and review
- Support for thousands of devices (Input/Output, Cameras, Access Control) - including integrated security credential management.
- Ability to pair combinations of Fixed and PTZ views to work in concert with SpotterRF's "slew-to-cue" effective target tracking.

Benefits of using SpotterRF:

- Detect and track multiple intrusions at once
- Use less equipment to cover 1 to 100+ acre critical sites
- Reduce false alarms from 100's or 1000's per day to a near zero level
- Automatic cueing of PTZ cameras onto threats with no human intervention.
- Immediately alert operators only when there is actually something of interest happening on your site.

**MIP Integration
of the Year
Americas 2016**

Benefits of combining the two with the SpotterXP Plugin:

- Eliminates the need for more than one screen per security solution.
- Manage multiple Spotter Sites from a single interface
- Minimize guard distraction by eliminating the need for multiple systems.
- Only video of active events is tracked with Alarm Definition and Analytical Events.
- Save amply on storage space and hours of review time.
- Customize/manage settings for your own radar alarms.
- Single "pane of glass" experience of live video and radar feeds at every radar alert.
- Every alert is recorded with both video and radar map views for replay and forensics.
- Review and export of past or current events is easier than ever.
- Easily set up specific views of both radar map and video feed.
- Manually disable SpotterRF's automatic PTZ tracking to follow a target through Milestone XProtect's native interface.

"We're very happy with all the elements of the project. The radar units, the camera, the Milestone video management software, everything is working well."

- BJ Kirschhoffer, Director of Field Operations, Polar Bears International
