

**ARROWLABS SOFTWARE**

**Introduction to Milestone Integration with MIMS Software via MIMS Driver**

## **Integrate to MIMS SOFTWARE USING MIMS DRIVER :**

1. Installation of MIMS Software (MIMS Portal / Mobile Operator Client / MIMS CLIENT) via the installation MSI file provide by ArrowLabs.
2. Load ArrowLabs Milestone driver (.dll) in the server portal , using the third party system settings .
3. Add Milestone Server details like IP , Port , Username and Password while loading the driver in MIMS server portal .
4. Run MIMS MOC (Mobile Operator Client ) , Go to Server - > Setting and select the Milestone server added from MIMS portal .
5. Check if connection to server is successful , Go to main tab , it should load list of Cameras available in the Milestone server . Also user will be able to get Alarms and events in the Event tab generated by hardware devices like sensor alarms.
