- Open the management client
- In the tree-view on the left side expand MIP-Plug-Ins
- Find and expand eyeUnify Plugin for Milestone
- Select eyeUnify Plugins for Milestone
- In the center column right click on eyeUnify Plugins and select Add New
- Enter a name (Configuration ID) to identify this configuration
- In the right column enter the IP of the eyeUnify.core server
- Enter the eyeUnify username and password
- Use the Test Connection button to test the connection to the eyeUnify.core server

## 4. Mileston Plugin User Manual

#### 4.1. Configuration

- Open the configuration menu
- Drag the eyeUNIFY milestone plug-in in a Window Space
- Select the appropriate configuration ID

#### 4.2. Usage

- Select your wall in the dropdown menu in the bottom row
- In the layout tab a click on a layout opens it on the selected wall
- In the windows tab you can replace the source of a window by selecting a source from the list on the left and then clicking on the window which source you want to replace.
- In the sendcommand tab click on a sendcommand button to execute it.

## 5. Troubleshooting:

Click on the error message in the upper left corner to get more information about the error:

**Connection Error** 

- Check if IP-Address, Username & Password are correct.
- Check the Network Connection

#### License Error

• Check if eyeUnify license is SURVEILLANCE

#### Plug-in Id error

• make sure the plug-in has a plug-in id selected
