

Milestone Verified Solution

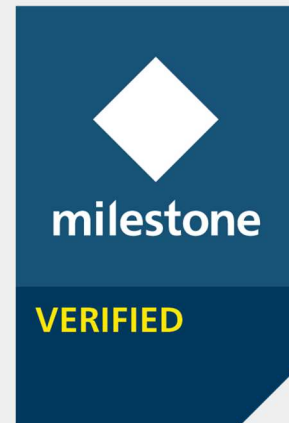

Confirmation of Compatibility

Partner: Soliton Systems

Partner Product: Zao VMS Plus 201b1 (2062)

Milestone Product XProtect®: Corporate 2019 R1

Date of Verification: 23-05-2019

Summary of Verification

This is a driver integration and it has been verified by the Milestone Driver Quality Assurance Team.

Partner also provided a remote desktop session to Milestone where the Partner Product proved to be compatible with XProtect® version applied.

The Partner Product's compatibility is verified by Milestone Engineers. Partner provided Milestone with the following for the verification process:

- Soliton Milestone Whitepaper
- Document describing the XProtect setup procedure
- Architecture diagram
- Screenshots

For details on the exact features and firmware version(s) integrated with and supported by Milestone, please refer to [Milestone Supported Device List](#).

The Milestone drivers are available for download and installation as part of the [Milestone Device Packs](#).

About Milestone Device Packs

Milestone drivers are split into two types of installers: a **device pack** with drivers for the most commonly used devices and a **legacy device pack** with drivers for cameras that are older and less used.

Device Packs are released bi-monthly.

For details, please refer to the [Device Packs page](#).

Milestone does not warrant our partners' products nor functionalities. Milestone only verify compatibility with the Milestone XProtect version applied in verification tests. Milestone does not verify product compatibility for installations not comparable with the testing environment.
