

Customer story: 's-Hertogenbosch

Since 2020, the city cameras of the municipality of 's-Hertogenbosch (Den Bosch) are secured by Oddity. Live **violence alerts** from 30 cameras are being sent to the surveillance center of Den Bosch, on real-time street footage. Since the beginning, Oddity picked up numerous fights on the streets of Den Bosch. Fights that otherwise would have been missed by surveillance staff.

Municipality of 's-Hertogenbosch

Oddity secures the city cameras of the municipality of 's-Hertogenbosch since 2020. Violence alerts are being sent 24/7 to the 's-Hertogenbosch Milestone setup in the surveillance center.

The algorithm has made a significant improvement since the start of the project. False positives have been reduced considerably over time and have been, and still are, at a very satisfactory level. Furthermore — and most importantly — Oddity **never** missed a violent incident.

Oddity works closely together with Den Bosch for continuous improvement of the software. Oddity also works closely together with the security integrator of Den Bosch.

Are you curious what Oddity can offer you? Please get in touch via the Milestone Marketplace form, or visit www.oddity.ai.
