

ScanViS ID

AIEng Corporate Security System

Making facial recognition technologies accessible and affordable to enterprises and organizations

Why facial recognition is becoming important for corporate security?

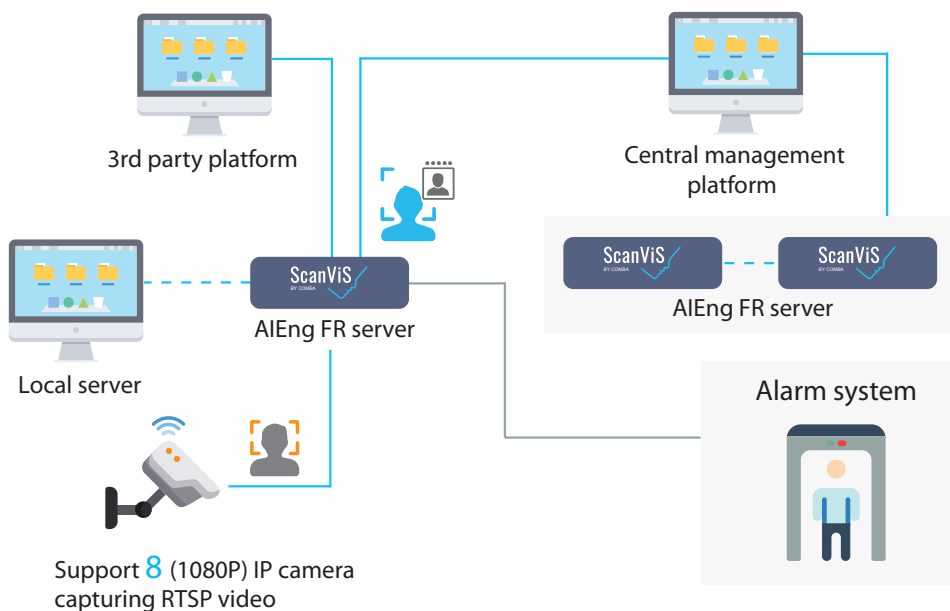

As facial recognition (FR) software mathematically maps out face features of the user attempting a login and compares it against the image enrolled in the system, security-conscious organizations are sitting up and taking notice of FR technology's rising adoption across industries.

Demand drivers
from the
vertical market

	Surveillance	Security	Watchlist alert	Analytics
Property	✓	✓	✓	✓
Enterprise	✓	✓	✓	✓
Healthcare	✓	✓		✓
Hospitality	✓	✓	✓	✓
Event venue	✓	✓	✓	✓

How does AIEng work at entry points of premises?

AIEng FR server verifies faces.

Management platform

- Real-time detects individual faces, extracts attributes, and matches the face with a database of registered faces.
- ID management and blacklist alert.
- Device management.

Alarm system setting

Pops up alert window on platform and triggers alarm sound.

Enterprise-grade face recognition

Innovating system for safer work environment

ScanViS AIEng is a powerful facial recognition server designed to process and manage extensive face database for enterprises or organizations that need to handle a massive number of visitors in buildings, venues or premises.

Given that the system delivers facial image analysis and powerful local management functions, superior portrait library delivery, device status management and remote upgrade are just at the corner.

Server capacity
up to
1 million faces

Detects up to **1,000 faces** in one minute.

Captures up to **20 faces** in one scene.

Full recognition
Recognizes faces regardless of beard, hats, makeup, etc.

Data management anywhere
Built-in security system enabling **local** or **cloud server** for central data management.

Function Customization
Alternative interface for data aggregation, backend data comparison, remote management, and others.

Better Security
Instant alert for unregistered/ blacklisted users to security/ property office.

Automation
Real-time face verification and access logs monitoring via a **Web GUI** of the management platform.

ScanViS AIEng
