# PRODUCT COMPARISON REPORT

Whether you are looking for a product upgrade or searching for something new, this report includes the features and capabilities that can take your VMS to the next level.

---

## Comparing XProtect Express+ with XProtect Professional+

Divided into overall categories, the report includes the features and capabilities that you gain when choosing XProtect Professional+ over XProtect Express+

### Cybersecurity and user rights

Ensuring the security and integrity of your installation is always a top priority for us. This category shows the results of our efforts to protect the system from theft and damage to the hardware or software - as well as from disruption or misdirection.

---

### Device Password Management

Easily manage your device passwords directly within XProtect itself saving time and reducing the hassle during initial deployment and for future security safeguarding routines. Device password management is easier than ever with a built-in password generator complying with the requirements from each of the individual supported device manufactures. Initially available with Device Pack 10.3 with support for Axis, Bosch and ONVIF compliant devices.

### Smart Client profiles

XProtect Smart Client profiles allow system administrators to control how XProtect Smart Client should look and behave and what features and panes XProtect Smart Client users have access to.

### Performance and scalability

Expect the best from us when it comes to performance, scalability and reliability. This category shows the results of our efforts to continually offer you scalable, high-performing video recording software - so that you can count on getting the industry's best performance.

---

## Scalable Video Quality Recording™ (SVQR)

Helps users make the most of camera-based edge storage, enabling recording of high quality video to the edge storage while recording a low-quality reference video centrally in the VMS recording servers. This provides a cost-efficient way of capturing high-quality, pre-event recordings.

## Unrestricted number of recording servers

The possibility to add an unrestricted number of Recording Servers to the XProtect Professional system enables users to scale their installation easily and cost-efficiently.

## Unrestricted number of cameras

There are no restrictions on the number of cameras or other types of hardware devices that can be added to the system.

## Ease of use

Ease of use is at the heart of everything we do. This category shows the results of our efforts to provide you with a solution that is easy to work with in every aspect - from the initial installation and configuration through to the final everyday usage.

---

## Move hardware

Wizard for easy moving of hardware devices between recording servers in runtime without losing settings, recordings, rules, permissions etc.

## Core VMS

We have been bringing value to you and more than 500,000 customers worldwide since 1998. This category shows the results of our efforts to expand and optimize the capabilities expected of the globally leading VMS provider.

---

## Edge Storage

Refers to the capability to store video recordings inside the actual camera capturing the video. The use of edge storage unlocks a number of possibilities to optimize recording server performance and the use of network and storage infrastructure in a video surveillance installation.

## Manual bookmarking

Provides an easy way for users to mark video sections of interest and add descriptive notes for later analysis or sharing with other users.
