

Signatrix Self Checkout Exit Control

Make your Self-Checkout Area Pushout-Proof

Intelligent Shopping Cart
Detection and Tracking

Intelligent Exit Control for stationary Self-Checkout areas

Our intelligent software monitors CCTV feeds from the open entrance area and automatically recognises pushouts - attempts to remove carts filled with goods without paying.

Why Exit Control?

Exit Control supports in-store and security staff as well as store management on three levels.

Level 1 Data Generation

Reliable detection and quantification of pushout-related losses

Level 2 Immediate Loss Prevention

Active Deterrence via integration of alarm systems
Staff notification

Level 3 Forensics

Easy-to use archive of suspicious incidents
Dashboard for store management

High adaptability

Deployable in all stores using stationary self-checkouts

Integrates with existing CCTV cameras and VMS solutions

Exit Control delivers

Improved Customer Experience

Make physical barriers a thing of the past

Transparency

Generates reliable data on proceedings in the SCO area

Security

Efficient Loss Prevention

Improved Customer Experience

Give staff one less thing to worry about and enable customer centricity
