

Milestone Husky M20-12T-16P/M50-64TR-8

The Milestone Husky™ M20 is a custom-designed NVR featuring the latest high-performance hardware for users who want a proven, predictable and reliable solution. The Husky M20 is a stand-alone NVR that is rack mountable and supports up to 32 cameras. Preloaded with industry-leading Milestone XProtect software, the Husky M20 has an optional integrated Power over Ethernet (PoE) managed switch and Smart Start plug-and-play features, which simplify the system setup process and save time during installation. Ideal for low-to-mid-market installations, such as retail chains, bank branches and office campuses.

Milestone Husky™ M50 is a rack-mounted solution with high-grade hardware engineered specifically for surveillance, providing reliable top-level performance. Ideal for mid-size to large installations, the unit has feature-rich Milestone XProtect video management software preloaded for easy control of video surveillance. Backed by the industry's largest community of manufacturers, Milestone Husky M50 works with the widest range of cameras, software integrations and surveillance solutions, ensuring you have the perfect solution today and tomorrow.
