

# LIMITED TIME OFFER

## Upgrade to XProtect® Express for free

As you might have heard, Milestone Systems is transforming XProtect® Essential to their new free VMS product. This gives you a unique opportunity to upgrade to XProtect Express, a more powerful VMS, for free. But as is the case with most offers – it's only available for a limited time.

**Until December 31, 2016**, you can upgrade to XProtect Express for free, when you purchase three years of Milestone Care™ Plus at a **50% discount**.

If you already have Milestone Care Plus, you can upgrade to XProtect Express for free at any time.

### What's Milestone Care Plus?

Milestone Care Plus gives you free, immediate access to the newest VMS updates. Having Care Plus ensures you always have access to the latest functionality.

It also helps us help you, as a Care Plus agreement includes access to Customer Dashboard, an online system monitoring service that enables us to monitor your system and address potential issues before they disrupt your business.

### Why should I upgrade to XProtect Express?

In addition to the benefits you get with Care Plus, upgrading to XProtect Express gives you:

#### Support for Milestone Interconnect™

One of the changes that comes with the free version of XProtect Essential is that it no longer works with Milestone Interconnect. So if you want to interconnect your sites, you'll need to upgrade to XProtect Express.

#### System expansion

Once your version of XProtect Essential is discontinued (see dates below), you won't be able to purchase new camera licenses for it. In order to add new cameras to your system, you'll need to upgrade to XProtect Express.

#### Support for third party integrations

XProtect Express lets you integrate other third-party systems into your video system. So if you want to integrate your access control or point-of-sale system with your VMS, you'll need to upgrade to XProtect Express.

#### Keep in mind

XProtect Essential 2013 will be discontinued on **October 7, 2016** and XProtect Essential 2014 will be discontinued on **May 21, 2017**. Essential 2016 will be discontinued in **December 2018**.

Additional camera licenses and Care Plus for these VMS versions will only be available for purchase until their discontinuation dates. After that date, it will not be possible to purchase licenses for these systems.
