Product highlights

Start your system small and grow big

Proven award-winning software that works with any camera

Supports up to **eight cameras at no cost** so you can start with zero software investment

With **unlimited retention time** you can rest assured video recordings are always there when you need them

An optional **yearly subscription package** includes support for additional cameras and access to the latest set of innovative capabilities so XProtect Essential can grow with you

Find the video you need, when you need it

An **interactive map** helps you identify camera locations and navigate directly to live video

Easily sort through hours of video by only examining **sequences containing motion**

Locate a specific incident by quickly browsing through motion-based recordings **in a specific area**

Easily document events and share video files with the **built-in video player**

Password-protect video files to ensure only authorized users can access them

Access your surveillance anytime, anywhere

Three free clients provide access on-site, off-site and on-the-go

Milestone Mobile gives ultimate peace of mind with access to the system from anywhere

XProtect Web Client enables you to connect anywhere through browsers

XProtect Smart Client is a powerful interface for daily operations with sophisticated tools for finding and exporting evidence material
