

XProtect Express is manageable, affordable video management software (VMS) for smaller single-location companies. It's the ideal choice when you want to do a bit more than monitor and record video. XProtect Express supports third-party integrations, so you can link an access control or point-of-sales system to your video for a complete surveillance solution. It's the perfect match for retail shops, parking lots or office buildings with moderate security needs.

What's new in XProtect Express 2016 R3

25% price reduction

Alongside the initiative of making XProtect Essential free, we have significantly reduced the price of XProtect Express by 25% to make it a competitive entry-level paid product. XProtect Express continues to include all the same features and capabilities, such as single-layer map, support for third-party integrations and Milestone Interconnect.

No camera licenses included in base license

In order to simplify the license policy across the entire Milestone portfolio, the two camera licenses previously included in the base license will no longer be included.

Milestone Care Plus changes

With the price reduction, the following changes will be applied to the Care Plus policy;

- Care Plus will be calculated on camera licenses sales only, not calculated on the base
- 1-year Care Plus no longer included in the price of XProtect Express
- Care Plus continues to be available as an optional 1-5 years offering

Simplified export in XProtect Smart Client

To make our products even easier to use for occasional users, the export dialog in the XProtect Smart Client has been streamlined when running in simplified mode.
